RE: Remmele "B" Federal #12Y
F, Sec 27, T6S, R22E

Dear Brian,

It was recently brought to my attention that the OCD is in need of a Four Point Pressure Test (Form C-122) for the above referenced well. However, this test is not economical to perform due to low production volumes averaging 50 MCFPD.

Therefore, I request your approval of our pending C-104. If, however, there is anything else you require, please let me know.

Thanks for your help.
