13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

McKay Oil Corporation proposes to construct a natural gas flow line from the Snakeweed "B" Fed. #4 to connect with McKay Oil's existing gas gathering system. The flow line will be constructed of 2-3/8" line pipe and will be initially laid on the surface. After testing the well and determining that it is capable of production, we will bury the line. The flow line will run west-northwest approximately 200' to connect with McKay Oil's system.
