Sec. 3, T. 9 S., R. 26 E.
Chaves County, New Mexico

PAGE 7

All trash will be placed in a portable trash cage. It will be hauled to the county landfill. There will be no trash burning. Once dry, contents of the reserve pit will be buried in place. Human waste will be disposed of in chemical toilets and hauled to an approved dump station.

8. ANCILLARY FACILITIES

There will be no air strips or camps. Camper trailers will be on location for the company man, tool pusher, or mud logger.

9. WELL SITE LAYOUT

See Pages 12 and 13 for depictions of the well pad, reserve pit, trash cage, access onto the location, parking, living facilities, and rig orientation.

10. RECLAMATION

Reclamation starts once the reserve pit is dry. It usually takes a year for the reserve pit to fully evaporate, at which point it will be backfilled. The detour road, pad, and backfilled pit will be recontoured to a natural appearance. Soil and brush will be evenly spread over disturbed areas. Disturbed areas will be ripped or harrowed. A BLM approved seed mix will be sown in BLM approved manner.

If the well is a producer, then the reserve pit, pipeline route, detour road, and any other areas not needed for workovers will be reclaimed as previously described.
