(State or Territory)The elevation of the derrick floor above sea level is 4736 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

A total depth of 1221 ft. was reached. The Glorietta was topped at 1197 ft. We plugged and abandoned the well by placing a 50' cement plug at 500' and by placing a 10 sack cement plug in top of surface pipe with a 10' by 4" pipe monument. The pits have been filled and covered.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
