

9. WELLSITE LAYOUT:

- A. Exhibit "D" shows the relative location and dimensions of the well pad, reserve pit, and major rig components. The pad and pit area has been staked and flagged (400' X 400').
- B. Mat Size: 185' X 140' plus a 100' X 100' reserve pit.
- C. Cut and Fill: None will be required.
- D. The surface will be topped and compacted with caliche and the existing surface material on the location. The reserve pit will be plastic lined.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations all equipment and other material not used for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing a condition as possible.
- B. Any unguarded pits containing fluids will be fenced until filled.
- C. If the proposed well is non-productive, all rehabilitation and/or revegetation requirements and surface restoration will be in accordance with the requirements of the Bureau of Land Management and the Minerals Management Service, and will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment.

11. OTHER INFORMATION:

- A. Topography: The land surface in the vicinity of the wellsite level with a slight westerly slope.
- B. Soil: The topsoil at the wellsite is a sandy loam underlain in spots with caliche.
- C. Flora and Fauna: The vegetative cover is primarily that of grass consisting of Grama, Three-awn, and tobosa. There are also yucca, cholla cactus, desert holly and broom snakeweed, and other miscellaneous weeds and grasses. Wildlife in the area is that typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles, dove and quail.
- D. Ponds and Streams: There is a manmade surface cattle tank (Burro Tank) near the existing access road approximately 2500 feet southwest of the location.
- E. Land Use: Cattle grazing.
- F. Residences and Other Structures: None within a mile.
- G. Surface Ownership: The proposed location and part of the access road will be on Federal surface and minerals. The new access road is all Federal surface and part of the existing access road. A portion of the existing road is on private surface of the Key Ranch and a land-owner surface damage agreement has been made.
