Re: Playas Townsite Exploratory Oil Well Area Reclamation

Dear Mr. Ramsey:

According to your request, Mr. Bill Harmon has inspected the exploratory well area reclamation made by Bar VS Company and has found it to be satisfactory. The mud pits were all emptied and filled with soil, the general area was re-contoured to its original topography, and the site was cleaned up. A pipe marker placed over the well identifies the site and has the necessary information welded on its side.

If you have any questions, please contact Mr. Bill Harmon at 505/436-2211, Ext. 227.

Very truly yours,

W. H. Champion  
Smelter Superintendent
