Re: Guy I. Warren New Mexico State  
No. 25-1 (Formerly Humble Oil &  
Refg. Co. N.M. State "BA" No. 1)  
Hidalgo County, New Mexico

Gentlemen:

Attached for filing are Forms C-101 and C-102 for the subject well. You will note that Mr. Guy I. Warren proposes to reenter this old plugged well and test a formation at approximately 4200'. Since this is an old well and the location was previously filed by Humble Oil and Refining Company, we have not included a Registered Professional Engineers Certificate on Form C-102.

Tarpon Management Company, located at the above address, will supervise the reentry in this well for Mr. Warren. Mr. Warren's deal on this well requires that operations be commenced by July 18th. We would appreciate your calling us collect should additional information be necessary in order to permit immediate approval of our reentry application.

We have requested our insurance agent to obtain the plugging bond from their New Mexico representative and file with your office and the State Land Department in Santa Fe. We will appreciate any help from you that will enable Mr. Warren to complete tests for possible gas in this well.

Yours very truly,

*Burlin E. Freeze*
