(NOTE: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any
proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones perti-
nent to this work.)*

Due to hole conditions it has been impossible to drill this well below 1006 feet with a cable tool rig. We therefore propose to move off cable tool and move on Artesia Fishing Tool rig # 1 to retrieve bailer lost in hole at total depth, pull 8 5/8" casing and ream hole down and drill ahead to the top of the San Andres with 12 1/4" bit and run 8 5/8" casing and circulate cement to surface. We will then drill ahead to basement with a 7 7/8" bit expected between 3,500 and 3,700 feet. If production is indicated we plan to run 9.5# 4 1/2" casing, cement and run production test.

18. I hereby certify that the foregoing is true and correct
