### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to reenter and deepen to 2500 feet this hole which was originally drilled to 1775 feet by John J. Linner. If production is encountered we propose to cement 54 inch casing on prospective pay. If dry we propose to reset the cement plugs at 1547 feet and in the surface casing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
