Re: J. M. Lewelling
#1-D, 12-12S-9E
Otero County, N. M.

Gentlemen:

We are returning the enclosed Forms C-105 on the subject well for the following reason.

The information as submitted thereon appears to be just a flow guage and not a completion as a commercial gas well.

Please submit Form C-103 reporting the perforations, treatment and flow guage for each zone tested; also show where bridge plugs were set to isolate each zone, and send one copy of the GR Neutron and Compensated Neutron Formation Density Log.

When the well is completed as a producer or plugged, Form C-105 will be required, and the Formation Record must be filled in.

If you have any questions concerning this matter, please feel free to call upon me.

Sincerely yours,

W. A. Gressett
Supervisor, District II
