

10. Plan for Restoration of the Surface:

- A. After finishing drilling and/or other completion operations, all equipment and other materials not needed for further operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite as pleasant in appearance as possible.
- B. If the proposed operation is nonproductive, all restoration and/or vegetation requirements of the BLM will be complied with and will be accomplished as quickly as possible. All pits will be filled and leveled within 90 days after abandonment.

11. Other Information:

- A. The ^{grazing lessee} ~~surface owner~~ is James Coody, 505/963-2383, he has been contacted regarding the drilling and completion operations. The mineral owner is the Federal Government.
- B. The topography consists of sandy soil with native grasses. No wildlife was observed, but the usual inhabitants of this region are jackrabbits, reptiles, coyotes, etc.
- C. There are no ponds, lakes, streams or rivers in this area.
- D. An Archaeological Survey has been made and a copy has been sent to Roswell office. There is no evidence of any significant archaeological, historical or cultural sites in the area. Also, there are no occupied dwellings or windmills.
