The elevation of the derrick floor above sea level is _____ f

DETAILS OF WORK

ILLEGIBLE

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings, measures, etc.; show casing points, and all other important proposed work)

At total depth of 1628' line, ran and set 9 5/8" casing at 1627' and cemented with 375 sacks of 45 gal cement, 50 sacks of neat cement and 42 sacks of wellite. Plug down at 12:30 P.M. on 12-26-50. Top of cement behind casing 875' by temperature survey.

Top of Artesian sand 865' by drilling time and well samples.

Perforated 9 5/8" casing with two 1/2" holes at 865' and recomputed with 200 sacks 45 gal cement and 40 sacks of wellite. Plug down at 5:30 P.M. 12-27-50. Top cement behind casing 625' by temperature survey.

Checked top of cement with Mr. Jack Frost of U.S.G.S. and Mr. Yates of Artesian Well Supervisor's office by telephone and received approval of both offices to continue operations.

Found top upper cement plug at 808', drilled out plug and tested with 800' for 30 minutes, final pressure 860'. Found top lower plug at 1600', drilled out

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

plug and tested with 800' for 30 min, final pressure 890'. Drilling ahead.
