DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Well was drilled to 555'. Cemented 7" O.D. casing with 15 sacks. Plug was drilled, resulting in a dry hole. Plan to pull as much of the pipe as possible, running cement at top of pipe left in hole, fill the hole with mud to the top and set marker.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
