The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Expect to drill to approximately 1800 feet total depth; will set approximately 350' of 8-5/8" casing and cement with 50 sx; will set approximately 1760' of 7" casing and cement with 25 sx.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
