Well No. 3 is located 2130 ft. from $\left\{ \begin{smallmatrix} N \\ S \end{smallmatrix} \right\}$ line and 1550 ft. from $\left\{ \begin{smallmatrix} E \\ W \end{smallmatrix} \right\}$ line of sec. 25SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 25 16 South, Range 30 E., N.M.P.M.
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)Square Lake Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We desire to plug and abandon the above well which has been producing as the expense of operating same in comparison to the production realized does not warrant its operating. There is 480 (feet) of 8 $\frac{1}{4}$ " casing in the hole, cemented with 50 sacks of cement, and 2900 (feet) of 5 $\frac{1}{2}$ " casing in the hole, cemented with 150 sacks of cement. The total depth of the well is 3100 (feet)

We propose to place a cement plug at the bottom of the 5 $\frac{1}{2}$ " and at the base of the salt and fill the hole with mud between the plugs and to the surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
