The elevation of the derrick floor above sea level is 5229 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Notice of intention to drill, submitted April 10, 1961, stated the 4 1/2" production casing would be cemented in two stage, utilizing a stage collar at approximately 1000'. It is now planned to omit the stage collar, utilizing sufficient cement through the casing shoe to obtain returns to the surface in one stage.
