OTD 8302 P &amp; A 10-25-76

This old deep test was plugged back to 1500' and capped with a dry hole marker in October, 1976'. The pad and access road were left "as is" except for the pits which were levelled. We propose now to remove the cap and marker, to clean out the hole to 1500' and run 5½" 14# J-55 casing and cement to the surface. Will perforate and sand frac for San Andres completion.
