If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to change the setting depth for the 7" ^{CIRCULATE} casing from 970' to 1500' and cement with approximately 625 sx. of cement. When cementing the 4 1/2" casing we shall not circulate but will cement to the bottom of the intermediate casing thus allowing us to perforate without difficulty.
