 ☐ Other (Explain):
☐ Plugging
 ☐ Remedial Work

Detailed account of work done, nature and quantity of materials used, and results obtained.

During February and March of 1963 we attempted to re-enter this well. After cementing 590' of 7" surface casing we were unable to get back in the old hole. New hole was drilled to 1614' where drilling was temporarily abandoned.

We plan to move cable tools on this well immediately and drill it down to the Loco Hills sand and complete the well as a producer.

Plans for casing this well will be submitted later after we see if we can drill back into the old hole.
