13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is devicementally drilled, give subsurface locations and measured and true vertical depths for all casings and zones pertinent to this work.)

Socorro Petroleum field personnel discovered water flowing from the 8 5/8" surface casing. Devon Energy Corporation (Nevada) acting as a contractor for the operator, Socorro Petroleum, will commence immediate operations to determine the source of the water flow and make the necessary repairs. Once workover operations are underway and additional information is obtained, the BLM will be informed of the planned remedial action. Workover operations are to begin May 5, 1994. The BLM's Shannon Shaw was verbally informed of this situation on May 4, 1994.
