13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Proposed to plug & abandon this wellbore as follows:

Set CIBP in 7" production casing @ 1817'. We will perforate 8 squeeze holes @ approximately 1300' (base of salt @ 1250') and set cement retainer. A bradenhead squeeze will then be performed by pumping 225 sk of Class "C" cement down the 7" production casing through holes @ 548'. Sufficient volume of cement will be pumped to fill this 7" X 8 5/8" annulus space w/cement. Surface plugs will be set in the casing. All casing will be cut off 4' below ground level and dry hole marker installed.
