17. Describe the Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The well has been shut-in since mid 1972 because it reached the economic limit. We would like to maintain the temporary abandonment status until this well can be utilized in a secondary recovery project. Due to present production conditions it is very hard to estimate when the well will be utilized but we estimate it to be probably within the next 12 months.

The present condition of the well is such as to prevent damage to the producing zone, migration of hydrocarbons or water, the contamination of fresh water or other natural resources, or the leakage of any substance at the surface.
