Vandagriff
Well No. **43** is located **330** ft. from **[N]** line and **990** ft. from **[E]** line of sec. **7**
NW/NE/NE Section 7 **18-S, 27-E** **N.W.P.M.**
RED LAKE **REED** **NEW MEXICO**
(Field) **Ground** (County or Subdivision) (State or Territory)

The elevation of the ~~XXXXX~~ derrick floor above sea level is **3399** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill to approximately 1800' to test the San Andreas-Slaughter pay. Will cut 9-7/8" hole to approximately 1275' with rotary; setting 7" 23# casing and cementing same to surface. Will then drill 6-1/4" hole with cable tools to approximately 1800'; setting 4-1/2" casing and cementing back into the 7", tying both strings together with cement.

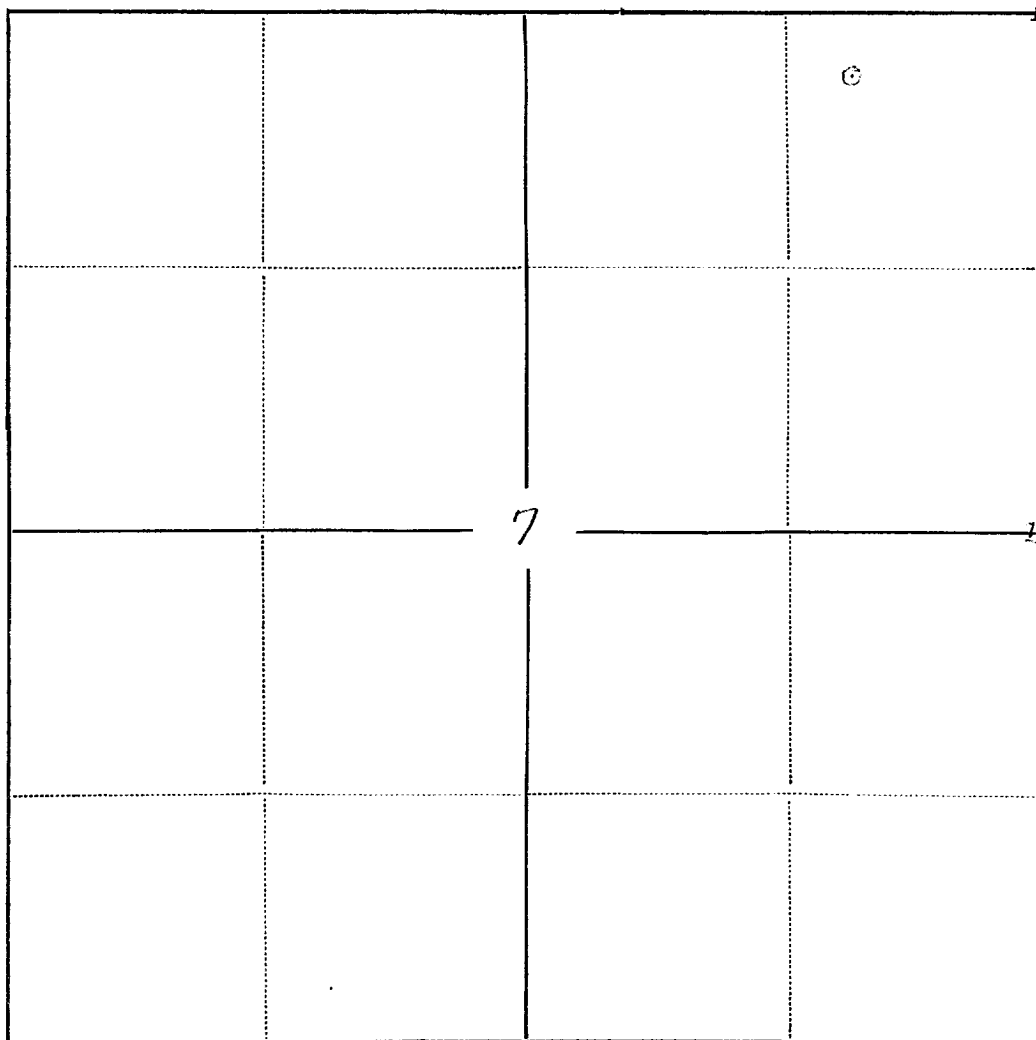

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
