Re: No. 19 Chalk Bluff Draw Unit
(A) SE SW Sec. 16-18S-27E

Gentlemen:

On a recent inspection of the above well I found there is a valve on top of the casing closed in. The marker was up beside the casing in good condition. But the dead men are still in place. If this well has been plugged please remove the dead men and file the plugging report.

Very truly yours,

OIL CONSERVATION COMMISSION

W. A. Gressett
