

- E. Trash, waste paper, garbage and junk will be buried in a trash pit and covered with a minimum of 24" of dirt. All waste material will be contained to prevent scattering by the wind. Location of the trash pit is shown on Exhibit "D".
8. ANCILLARY FACILITIES:
- A. We propose to bury existing flowline (Manzano Oil) below the surface to avoid impacting line. Exhibit "B" displays the flowline in relation to the location.
9. WELLSITE LAYOUT:
- A. The drill site has been surveyed, staked and flagged.
- B. The dimensions and relative location of the drill pad, mud pits and the trash pits with respect to the wellbore are shown on Exhibit "D".
- C. The wellsite is nearly level and will not require any cut or fill. The drill pad will be surfaced with caliche.
10. PLANS FOR RESTORATION OF THE SURFACE:
- A. After completion of drilling and/or completion operations, all equipment and other materials not needed for operations will be removed. Pits will be filled and the location cleansed of all trash and junk to leave the wellsite in an aesthetically pleasing condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment, all equipment, trash and junk will be removed and the location cleaned. Any special rehabilitation and/or special revegetation requirements of the surface management agency will be complied with and accomplished as expeditiously as possible.
11. OTHER INFORMATION:
- A. Topography: Slopes towards Nimenim Draw. Drainage to the West.
- B. Soil: Caliche float, sandstone outcrops.
- C. Flora and Fauna: Vicinity surrounding the drillsite is semi-arid desert rangeland. Vegetation is thinly scattered with desert shrubs interspersed with a small amount of native grasses. No wildlife was observed, rodents, coyotes, dove or quail.
- D. Ponds and Streams: None
- E. Residences and other Structures: A ranch house located approximately 2.0 miles East of location.
- F. Archaeological, Historical and Other Cultural Sites: None were observed in this area. The pad area was archaeologized on November 7, 1988.
- G. Land Use: Grazing and occasional hunting.
