The Pacheco Federal #1 well was recently recompleted in the Undesignated Delaware.

Current production is approximately 107 bo, 30 bw, and 100 to 150 mcf/gpd on 14/64 choke.

We are currently testing for economic justification.

El Paso Natural Gas will not take the gas due to the high H₂S content. We are negotiating with Phillips to purchase the casinghead gas.

We respectfully request a 60 day testing allowable.
