13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Devon SFS Operating, Inc requests approval to construct a water disposal line from its recently drilled Shugart 25 Federal Com #2 well. The pipeline will trend 1365 feet from the existing well pad and connect to an existing Devon disposal line. The pipeline will be laid next to the Bar-Ditch within the archeologically approved fairway of our lease road. This lease road was approved in the APD. See attached archeological report. The pipeline will operate at pressures less than 50psi and will consist of 3" or 4" SDR-11 poly pipe rated @160 psi. This is an on-lease installation, which does not require a formal ROW. Safety shut-off and tank level valves will be installed at the production facility so that working pressure will not be exceeded.
