Sec. 5, T-20-S, R-28-E
Eddy County, New Mexico

Gentlemen:

Enclosed you will find a set of electric logs run on the subject well. The well is currently shut in, following unsuccessful attempts to make commercial completion in the Morrow in a gross interval from 10,808-10,905'.

We are presently planning to abandon the Morrow and attempt completions in the Atoka and possibly in the Strawn formation. To ensure that we do not perforate out of zone during these operations, we would like to have you pick the tops of the Strawn, Atoka and Morrow formations on the wireline porosity logs.

Sincerely,

Donald R. Craig
District Operation Engineer

REJ/rs

Tops are as follows by Larry Brooks

Penn. 9489	Strawn 9830
Atoka 10227	Morrow Ls 10655
Morrow Clastics 10767
