WORKOVER REPORT

- 8/26/75: Unable keep well flowing, plan in a few days to unset the packer and attempt swab well back in, may have to install pumping unit.
- 8/28/75: Moved in Chase Workover unit & rigged up this morning, SITP 200#, bled press. off & unseated pkr., prep. to swab.
- 8/29/75: Swb. & flowed 10 hrs. (actually KO & F twice but died both times), swab @ rate about 5 bbls. fluid/hour.
- 9/3/75: Well shut-in, trying to locate a pumping unit, well loads up and will not flow for any length of time, 10 hr. swb. & flow 200 BW + 60 BO.
- 9/9/75: Waiting on pump equipment.
- 10/2/75: Rigged up workover. (Chase) Shut in tubing pressure 1200#, bled pressure off, prep. pull tbg. & packer, run tbg. without packer back in hole and rods, then install pumping equipment.
- 10/6/75: Rigging up pump jack.
- 10/7/75: Rigging up production equipment
