12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The attempt to re-enter 4 1/2" csg. stub @ 2865' was unsuccessful. A cmt. plug was set, above stub, @ 2865-2744'. The well has been shut-in since 12-17-90. It is proposed to move in a rotary rig, then utilize a downhole mud motor to sidetrack the 4 1/2" csg. and to drill new 7 7/8" hole @ 2744-6050' TVD (Bone Springs @ 6025'). The new hole will be deviated only enough to sidetrack the 4 1/2" csg., then returned to vertical, all the way to TD. Directional surveys will be taken throughout the entire operation. Upon reaching TD, open hole logs will be run up to 8 5/8" shoe @ 2403'. The proposed csg. will be 5 1/2", 15.5# J-55 LTC set @ 0-TD, and cmt. will be brought up into 8 5/8" csg. This application is made pursuant to Rule 111 (b). Since no offset operator exists, and surrounding 40 ac. plots are held by BCR, this application is being furnished only to the O.C.D. The nearest producing wells are Penn completions, one 1.25 mi. to west, the other 1.25 mi. to the east, south-east.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
