

THIRTEEN POINT PROGRAM

- 1) Existing roads: Existing roads which lead to the proposed drillsite are shown on Exhibit "A".
- 2) Proposed new road: The proposed new road is shown on Exhibit "A".
- 3) Location of existing wells: Existing wells in the vicinity of the proposed drillsite are shown on exhibit "B".
- 4) Location of Existing and/or Proposed facilities: This is a new lease and production facilities will be placed on the well pad.
- 5) Location and Type of Water Supply: It is planned to use a water supply well.
- 6) Source of Construction Materials: materials needed for construction of the well pad and road will be obtained from material found in place.
- 7) Methods of Handling Waste Disposal:
  - A. Drill Cuttings will be disposed of in drilling pits.
  - B. Drilling fluids will be allowed to evaporate in drilling pits until the pits are dry.
  - C. Water produced during tests will be disposed of in drilling pits.
  - D. Oil produced during tests will be stored in test tanks until sold.
  - E. Trash, waste paper, garbage, and junk will be buried in a trash pit and covered with a minimum of 24 inches of dirt. all waste material will be contained to prevent scattering by wind. Location of the trash pit is shown on Exhibit "C".
  - F. All trash and debris will be buried or removed from the well-site within 45 days after finishing drilling and/or completion operations.
- 8) Ancillary Facilities:
- 9) Wellsite Layout:
  - A. The wellsite has been surveyed and a 400'x 400' area has been staked and flagged.
  - B. The dimensions and relative location of the drill pad, and mud pit, and trash pit with respect to the well bore are shown on exhibit "C".
  - C. The well pad will be surfaced with material found in place.
