RE: IRON HOUSE 19 STATE COM #1H

Enclosed are the results of analyses for samples received by the laboratory on 11/10/14 11:00.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-13-5. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/ga/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celeg D. Keine

Celey D. Keene Lab Director/Quality Manager

RE: IRON HOUSE

Enclosed are the results of analyses for samples received by the laboratory on 11/18/14 8:55.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-13-5. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/ga/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keine

Celey D. Keene Lab Director/Quality Manager

barrels of oll. A vac truck responded same day and recovered 5 barrels of oll. Talon made an emergency One Call with NM 811 to start remedial activities. Describe Area Affected and Cleanup Action Taken.* The area affected from this release measured approximately 74-feet long by 40-feet wide. Talon mobilized personnel and equipment to the location and the visually impacted area was initially excavated between 0.5-feet to 2-feet deep where we encountered a rock shelf in the vicinity of sample location S-1 under the lond-outs and towards the pump jack. Rock was also encountered in the vicinity of sample location S-2. The contaminated soil was transported to Lea Land, LLC. Confirmation soil sampling was completed on 11/11/2014 and delivered to Cardinal Labs the same day for rush analysis. The lab results are attached along with a site map und groundwater data for the area. This battery has a high volume of truck traffic. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment.
