Describe Cause of Problem and Remedial Action Taken.*

Based on OCD document dated Jan 26 2015, Mr Pedro Prado, driving the RGS truck, admitted to dumping several loads of produced water on Fasken property from the R360 Surface Waste Management Facility. From OCD approx. 14 separate unauthorized discharges occurred.

Describe Area Affected and Cleanup Action Taken.*

Approx 250 ft around the white pin flags is the area of concern. Remediation will include length, width and depth discovery of contamination including testing for TPH, chlorides, RCRA metals and BTEX. Detailed remediation plan will be completed soon and sent to OCD for approval.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
