Release Notification and Corrective Action

OPERATOR

☒ Initial Report ☐ Final Report

Name of Company Frontier Field Services, LLC	Contact John Prentiss
Address 65 Mercado Street, Suite 250, Durango, CO 81301	Telephone No. 575-676-3528
Facility Name Anderson Ranch Discharge Line - #1	Facility Type Condensate transport line
Surface Owner Frontier Field Services, LLC	Mineral Owner
API No. N/A	

LOCATION OF RELEASE

Unit Letter	Section 28	Township 16	Range 32	Feet from the	North/South Line	Feet from the	East/West Line	County Lea
-------------	----------------------	-----------------------	--------------------	---------------	------------------	---------------	----------------	----------------------

Latitude **32.8806826 N** Longitude **-103.7714251 W**

NATURE OF RELEASE

Type of Release LOPC of heavy condensate from buried pipeline	Volume of Release Estimated 10bbl	Volume Recovered: 2bbl recovered from surface. Excavation underway.
Source of Release Pinhole leak discovered in buried heavy condensate pipeline	Date and Hour of Occurrence Unknown	Date and Hour of Discovery 1/26/15 @ 16:18
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Tomáš Oberding – NMOCD	
By Whom? Greg Busch – EHS Technician III	Date and Hour 1/27/15 @ 13:14	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.* N/A		

Describe Cause of Problem and Remedial Action Taken.*

On 1/26/2015, Frontier received a call from the automated answering services reporting a leak discovered west of NM-249 at 16:20. Frontier identified the pipeline in question and immediately blocked off the Anderson Ranch 6" discharge line. Frontier dispatched field personnel to positively identify the leak and upon arriving on site identified a puddle of heavy condensate gathered on the surface above a known underground condensate discharge pipeline. Notifications were made internally to operations leadership and environmental the following morning.

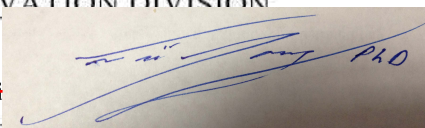

On 1/27/2015 Frontier estimated the release to exceed 5bbl and made prompt notifications to NMOCD.

On 1/27/2015 Frontier recovered ~2bbl free liquid from the surface with a hydrovac truck. All free liquid recovered was disposed of at an OCD approved facility. Excavation commenced to delineate and remove contaminated soils and to restore integrity of the pipeline.

Describe Area Affected and Cleanup Action Taken.*

Once excavation has uncovered the pipeline, problem areas will be identified and repaired. Excavation will continue until TPH, BTEX, and Benzene are below the levels outlined in "NMOCD Guidelines for Remediation of Leaks, Spills, and Releases". Impacted soils will be transported to an OCD approved facility for disposal and the area will be backfilled with clean soil.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
