REVIEWED
By OCD District 1 at 7:42 am, May 21, 2015

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
Well was shut-in and pumping unit turned off due to production practices, but pumping unit was turned on by an anonymous party causing stuffing box to blow out due to tubing and casing valves being shut. Pumping unit was turned back off by pumper upon arrival to stop the release.

Describe Area Affected and Cleanup Action Taken.*
Leaked fluid affected the well pad surface around pumping unit and also ran west of the pad out into the pasture an estimated 35 yards.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
