**RECEIVED**  
By OCD District 1 at 1:29 pm, Jul 09, 2015

**If a Watercourse was Impacted, Describe Fully.\***

**Describe Cause of Problem and Remedial Action Taken.\***  
Devon Lease Operator arrived at the Shinnery 14 Fed 5 SWD and discovered standing water on location and immediately shut in the well. He located the source of the leak and noticed it was coming from the 2x1 swedge connection plumbed into the wellhead. Upon further investigation Lease Operator noticed that the 1" threads on the 2x1 swedge were cracked and when the pump was running it would spray water out onto the location, also the wellhead plumbing was not sufficiently supported. 50 bbls of produced water leaked onto the north side of the pad. None of the produced water left the pad. Legendary Trucking recovered 40 bbls of the produced water.

**Describe Area Affected and Cleanup Action Taken.\***  
The affected area was 69x223 to the North of the well with all of it staying on the pad. Legendary Trucking was called to recover 40 bbls, and the rest will be scraped up at a later date.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
