Describe Cause of Problem and Remedial Action Taken.\*

Internal corrosion of an injection line caused 2338 bbls of produced water to leak onto the ground. A vacuum truck recovered 600 bls of water and the line was repaired or replaced.

Describe Area Affected and Cleanup Action Taken.\*

The area affected is approximately 500' x 300' off location and into the pasture. Remediation will be completed in accordance with a remediation plan approved by NMOCD.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
