Describe Cause of Problem and Remedial Action Taken.*

Steel Tank seam failure, releasing produced fluids into the facility berm. All standing fluid was recovered. The tank will be repaired or replaced.

Describe Area Affected and Cleanup Action Taken.*

Area affected was inside the facility tank berm; all fluid was contained within the berm. This is a very mature battery site. Soils inside the berm will be excavated as applicable and replaced. Impacted soil will be disposed at Sundance. Photos and further clean-up will be submitted.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
