#### NATURE OF RELEASE

Type of Release Sump Release	Volume of Release >5 bbls	Volume Recovered
Source of Release Sump	Date and Hour of Occurrence 09-30-2015	Date and Hour of Discovery 09-30-2015
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom? Jon Bebbington	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.* N/A		

**RECEIVED**

By JKeyes at 8:22 am, Oct 05, 2015

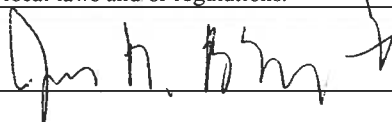

#### Describe Cause of Problem and Remedial Action Taken.\*

The fiberglass double wall sump that collects liquids from the engine skid overflowed onto the surrounding soil. It is unknown at this time whether the sump walls are the source of the release.

#### Describe Area Affected and Cleanup Action Taken.\*

An estimated 5 bbls of slop oil was released into a 5 foot deep excavation surrounding the sump. The environmental specialist requested that operations take the sump out of service, pump out the excavation, and initiate remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
