AR 8" Lateral; NMOCD Ref # 3656

Work Plan:

The cause and conditions of the spill was identified and alleviated. Excavation is now complete, TPH, BTEX, and Benzene are below the levels outlined in "NMOCD Guidelines for Remediation of Leaks, Spills, and Releases". All impacted soils was transported to an OCD approved facility for disposal. To comply with NMOCD request, a ten-mil liner will be placed along the entire east-wall from surface level down four feet, then this area will be backfilled with clean soil and a final report with supporting documentation will be sent upon completion.

Respectfully,

Harley Everhart
