By Whom?	Pam Inskeep	Date and Hour	4:45 p.m. CDT, 5/24/16		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

N/A

Describe Cause of Problem and Remedial Action Taken.\*

A pumper for another company passed by our battery and saw a water spray. Notified our pumper and Operations Manager. There was a break in a poly water transfer line which shot a mist of produced water. An estimated 4 to 5 bbls produced water sprayed in a mist over the battery location and into an adjacent pasture in an area 15' x 30'. There is no fluid to vacuum up, as the release was all mist and spray.

Describe Area Affected and Cleanup Action Taken.\*

See above explanation. No sensitive areas or surface waters were affected. Line will be repaired.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
