Katie:

Thank you for your prompt response. No, these data are not necessary.

Olivia

Sorry about that, the data was recorded. I didn't include it in the report because a soil bore was drilled in the same place. The deepest sample from the vertical located at SB-2 resulted in a chloride field titration of 5,030 mg/kg at 15 ft bgs. The deepest sample from the vertical located at SB-3 resulted in a chloride field titration of 2,604 mg/kg at 19 ft bgs. We did not send any samples to the lab from those verticals. Let me know if you would like all the data from those verticals and I will send it your way.

Thank you,  
Katie

Dear Katie:

A pleasure to meet you this morning. I have a couple of questions about the report. There was mention of a 2<sup>nd</sup> vertical installed on April 11, 2016 and 2 verticals after the 2nd release. Unless I missed them, data from these verticals were not included in the report. Were these verticals for exploratory purposes only? Were the field data recorded?

Thanks,  
Olivia

**Subject:** ROC - Justis K-36 AD (1RP-4248) Corrective Action

Ms. Yu,

Attached is the proposed corrective action for the Justis K-36 AD (1RP-4248) site. If you have time next week, I'd like to schedule a meeting to come by and discuss the site.

Thank you,

Katie Jones Davis
