Mr. Alves:

Yes. NMOCD requests that vertical delineation be completed as practicable for SP11.

Thanks,
Olivia

In response to the questions,

Our bore holes were placed in areas to not compromise lines or areas that were accessible to get into safely. So to clarify on sp 11 around that area we need to delineate further due to high levels on labs and field samples?

Dear Ms. Flores:

Please provide an explanation to the placement of the verticals as indicated in the delineation workplan for 1RP-4466. According to the preliminary surface samples, SP11 is above permissible chloride levels, which would indicate that there should be one nearer to this spot.

As a reminder, all laboratory analyses of TPH characterization must include GRO, DRO, and MRO.

Thanks,
Olivia
