Olivia,

We will proceed with the additional delineation efforts. Field work is preliminarily scheduled for the week of the October 23..

Thanks

Chris Cortez

Subject: RE: 2017-09-28_LeaDS1_Report.pdf

Mr. Cortez:

NMOCD accepts the data presented for BL-2 as evidence for the absence of groundwater within 100 ft. bgs in regards to 1RP-1607. Please be advised that the elevated chloride levels at 19-41 ft. bgs are probably not naturally occurring.

Please confirm that there will be 5 more soil bore locations for the North and 2 for the West excavation as indicated on the approved additional delineation plan approved on March 30, 2017.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
