Subject: RE: 1RP-4813 - Plains Alpha Gathering A-2 Main - Delineation Plan and Remediation Strategy

Mr. Lowry:

NMOCD approves of the proposed delineation plan for 1RP-4813. Please be advised that permissible chloride levels in selected delineation and remediation soil samples sent for laboratory analyses must be ≤ 600 mg/kg. Also, please note that the PLSS units are written incorrectly on the figures.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: FW: 1RP-4813 - Plains Alpha Gathering A-2 Main - Delineation Plan and Remediation Strategy

Olivia and Amber,

TRC Environmental Corporation (TRC) has prepared the attached *Delineation Plan & Remediation Strategy* on behalf of Plains Pipeline, L.P. (Plains), in regard to the Alpha Gathering A-2 Main crude oil release (1RP-4813), which occurred on September 8, 2017. The release site is located approximately eighteen (18) miles southeast of Eunice in Lea County, New Mexico, in Unit Letter "P", Section 28, Township 22 South, Range 34 East. The GPS coordinates for the site are N 32.355942 and W 103.468296. If you have any questions or need any additional information, please feel free to contact Camille Bryant or myself by phone or email. Thanks.

Respectfully,

Joel Lowry
