Subject: O.W.L release
Date: Monday, October 23, 2017 9:27:28 AM

Olivia,

I just received a call from Deana 214-364-7627 reporting a release for O.W.L. on a produced water transfer line located 32.064885, -103.273247. Lea County, SW of Jal. Approximate 2800 barrels released. Now I have had Inspector Kerry Fortner call and had an anonymous call come in that stated OWL had a maintainer-grader moving the spill site soil around. Caller said the site was west of Bennett on the El Paso pipeline right of way? At this time I do not have an inspector in the area.

District I AO/II
Hobbs, NM 88240
575-393-6161 ext. 102

Phillip Sanders 432-269-3735
said approx 2800 BBL lost
and 580 BBLs recovered. Was going
to pick up contaminated soil and put
on plastic, then wait for instructions
from OGD. 10-23-17 Gary Robinson
