Bob,

NMSLO agrees with delineation approval from NMOCD and stipulations set forth.

Thank you,

Amber Groves

Pardon. The 'bgs' after 5 ft. is a mistake. I meant 5 ft. additional vertical feet.

Subject: RE: Characterization Plan (Big Sky ABY State #1)

Mr. Asher:

To clarify, permissible chloride level is 600 mg/kg. There must be at least 2 depths with laboratory analyses indicating permissible levels: depth obtained and depth maintained at least 3 ft. further, optimally 5 ft. bgs.

Thanks,
Olivia

Subject: RE: Characterization Plan (Big Sky ABY State #1)

Dear Mr. Asher:

NMOCD approves of the proposed delineation for 1RP-4792 with these modifications due the presence of a playa within 200 ft. of the release location:

- 1) RRAL is 20.
- 2) Vertically delineate to 5 ft. bgs.
- 3) Establish background sample locations in the pasture, West of the release in heater treater area, rather than Southeast corner of the wellpad. Please be advised that this release occurred on State surface, not Fee.

Please confirm or inform for clarification. Like approval from NMSLO is required.

Thanks,

Olivia Yu
Environmental Specialist

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of

responsibility for compliance with any other federal, state, local laws and/or regulations.
