Ms. Johnson:

NMOCD approves of the proposed additional delineation required for 1RP-4316. Please note that there is a discrepancy on page 2 of the proposed delineation plan. Vertically delineate to obtain 600 mg/kg chlorides and maintain for at least 5 ft. further in depth.

Like approval from BLM required.

Thanks,

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
