Dear Mr. Garcia:

NMOCD approves of the delineation completed for 1RP-4582. Upon review of the data, NMOCD proposes a modification of the proposed remediation plan. These are the revised excavation depths:

North: 2 ft. East: 3 ft. South: 2 ft. Northwest: 2 ft.; liner not required NS2: excavation not needed.

Please confirm. Like approval from SLO is required.

Thanks,

Olivia Yu Environmental Specialist NMOCD, District I <u>Olivia.yu@state.nm.us</u> 575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Good morning Mr. Garcia:

I received a call from Ms. Barr about the status of 1RP-4582. NMOCD will not revisit the document sent on May 1, 2017 until the requested information by Ms. Groves is included.

Thanks,

Olivia Yu

Eric,

Before we can issue work plan approval, I will need to know what ratio you will be mixing pond bottom and topsoil. I also would like to advise you that on New Mexico State Trust land, even when remediation has been achieved the site will go into a monitoring period and will not be released until desired vegetation is achieved. If the pond bottom does not grow anything, the area will have to be dug up and re-backfilled with topsoil.

Thank you,

Remediation Specialist
