			If YES, Volume Impacting the Watercourse.		

**RECEIVED**  
By Olivia Yu at 7:34 am, Jan 05, 2018

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
Tank fitting failure. Fitting was replaced and tank returned to service. Released fluid was vacuumed into a truck and disposed at Sundance SWD. All fluid within the lined berm was recovered. 2-3 bbls ran onto caliche pad during cleanup and was shoveled into pile.

Describe Area Affected and Cleanup Action Taken.\*  
Impacted soils on the pad will be properly disposed at Sundance Disposal. Landowner, Mr. Boyd, was at the site and approved the clean-up.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
